

The wisconsin no call list, is the most progressive no call list in the country. It has virtually eliminated the intrusive telemarketers from calling. I had many offensive callers b4 the list was enacted and dont miss their rude calls at all. why punish us in WI for something we have taken upon to do ourselves. The fact that we are protecting our state citizens should not be taken away, by what? lobbyists for a group that wants to invade our privacy? Enough is enough, let us handle our state in the manner we want to and perhaps you should have the federal no call list get more proactive for citizens. Thanks
